Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of the invention of group I and the species of Fig 1 in Paper Nos. 11 and 12 is acknowledged.
2. Claims 4,5,18-20,24-³⁷29,41 and 42 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention/species, there being no allowable generic or linking claim. Election was made **without** traverse in Paper Nos. 11 and 13. The claim listing that applicant provided in paper #13 (1-**22,17,23** and 40) (emphasis added) does not make any sense. Claims 4 and 5 appear to be drawn to the embodiment of fig 2 and have also been withdrawn (pending the allowance of a generic claim).

Claim Rejections - 35 USC § 112

3. Claims 6-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. "Tips" (claims 6-8, line 1) lacks antecedent.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-3,6,17,22 and 40 are rejected under 35 U.S.C. 102(b) as being anticipated by Thomas et al (USP 2,246,867). The patent to Thomas discloses an oral

Art Unit: 1744

care device comprising a head (10) as well as a rocking element (16) having a plurality of protrusions (17) radially extending from a central portion thereof. The phrase "shaped to..." (claims 6 and 40) does not define any structure. The rocking element does include an "opening" (15) (claim 17) and pin (18) reads on the recited mounting element (claim 22).

6. Claims 1-3,6,22,23 and 40 are rejected under 35 U.S.C. 102(b) as being anticipated by Birch (USP 3,230,562). The patent to Birch discloses an oral care device (10) comprising a head (14) and a rocking element including a central portion (18) and a plurality of radially extending protrusions (20) which are tapered toward the free ends thereof. The elements (18,20) of Birch (as are the ones of the present application) are made of an elastomeric material (rubber) and are perfectly capable of rocking and the device is used. Birch also teaches that the element(s) may be mounted to the head with a mounting element (32) as in claim 22.

Claim Rejections - 35 USC § 103

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. Claim 21 is rejected under 35 U.S.C. 103(a) as being unpatentable over Birch (USP 3,230,562) in view of UK 2,214,420. The patent to Birch discloses the invention substantially as claimed with the exception of the element being co-molded with the head. '420 teaches the co-molding of an elastomeric tooth contacting medium (5) with

the head (2). It would have been obvious to one of ordinary skill to have modified the device of Birch as such so as to produce a more permanent connection between the two.

9. Claims 7-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Birch (USP 3,230,562). The patent to Birch discloses a similar material (rubber) to that disclosed in the present application as well protrusions having the recited taper, etc. The particular dimensions and durometer reading of the noted claims would be obvious to one of ordinary skill to suit the particular user.

Conclusion

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patent to Pounder et al is pertinent to massaging element with a plurality of protrusions and the patent to West to a further patent which combines bristles with a "rocking" element.
